

Morning Brief

Date/Time Stamp: Friday, Nov 24, 2017, 08:22

Morning Brief will posted on Fridays unless significant activity occurs.

Northwest Activity Summary

Over the last week: Mild, wet and windy for the majority of the time with high snow levels. No initial attack reported region wide. A little over 2,200 new acres of prescribed burning reported. Around 15 personnel are assigned outside the region, mainly on hurricane support.

Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD) (link)

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

Northwest Fire Potential Summary

Showers will linger in the mountains today but more wet weather will move into the region over the weekend and early next week. Temperatures will slowly drop to near normal by mid-week. It is currently looking like there will be a break in the wet weather near the end of the work week.
